

Standing option for 1 point of extra credit across the full course grade

A part of my job as your instructor is to prepare you for work after school. While maintaining a strong portfolio of work on a forum like GitHub will help you land a great job as a developer, your network is also going to have a large impact on your ability to find the right job for you.

One great way to manage your network is through LinkedIn. Think of it as social media for the active professional. It's a forum to discuss things relevant to your profession, maintain a strong network, and find the right job.

I actively maintain a high quality and complete LinkedIn account and accordingly I have recruiters reach out to me about twice a week asking me to set up interviews

To receive 1 point of extra show me in person that you have an "All Star" LinkedIn account.

ALTERNATIVELY if you have a networking service you would rather improve, let me know on piazza and we can arrange a similar grade. This would not be in addition to this one point of credit, but rather, in place of this one point of credit.

If you have questions, feel free to post them in the "Other" folder on Piazza.

The recording of this grade will not go into the gradebook. I will keep a separate ledger and apply the credit after raw final grades are calculated

In addition, if you would like, please feel free to "connect" with me on LinkedIn so we can easily stay in touch after the course is over.
